

TikZ tensor network diagrams

Jesse Osborne

20 February 2024

Finite MPS:

$$|\Psi\rangle = \begin{array}{c} A_1 \quad A_2 \quad A_3 \quad \dots \quad A_{N-1} \quad A_N \\ \circ - \circ - \circ - \dots - \circ - \circ \\ | \quad | \quad | \quad \quad \quad | \quad | \end{array} . \quad (1)$$

Gauge transform:

$$\begin{array}{c} A_i \\ \circ \\ | \end{array} \rightarrow \begin{array}{c} G_{i-1}^{-1} \quad A_i \quad G_i \\ \circ - \circ - \circ \\ | \quad | \quad | \end{array} . \quad (2)$$

Left-orthogonal form:

$$\begin{array}{c} A_i \\ \circ \\ | \end{array} \rightarrow \begin{array}{c} L_i \\ \lrcorner \\ | \end{array} , \quad \begin{array}{c} L_i \\ \lrcorner \\ | \\ \lrcorner \\ L_i \end{array} = \left[\begin{array}{c} \\ \\ \\ \end{array} \right] . \quad (3)$$

Right-orthogonal form:

$$\begin{array}{c} A_i \\ \circ \\ | \end{array} \rightarrow \begin{array}{c} R_i \\ \lrcorner \\ | \end{array} , \quad \begin{array}{c} R_i \\ \lrcorner \\ | \\ \lrcorner \\ R_i \end{array} = \left] \begin{array}{c} \\ \\ \\ \end{array} \right] . \quad (4)$$

SVD:

$$\begin{array}{c} A_i \\ \circ \\ | \end{array} = \begin{array}{c} U \\ \lrcorner \\ | \end{array} - \diamond - \begin{array}{c} V^\dagger \\ \lrcorner \\ | \end{array} . \quad (5)$$

Mixed-canonical form:

$$|\Psi\rangle = \begin{array}{c} L_1 \quad L_2 \quad \dots \quad L_{i-1} \quad C_i \quad R_{i+1} \quad \dots \quad R_{N-1} \quad R_N \\ \lrcorner - \lrcorner - \dots - \lrcorner - \circ - \lrcorner - \dots - \lrcorner - \lrcorner \\ | \quad | \quad \quad \quad | \quad | \quad | \quad \quad \quad | \quad | \end{array} . \quad (6)$$

$$|\Psi\rangle = \begin{array}{c} L_1 \quad L_2 \quad \dots \quad L_{i-1} \quad L_i \quad D_i \quad R_{i+1} \quad \dots \quad R_{N-1} \quad R_N \\ \lrcorner - \lrcorner - \dots - \lrcorner - \lrcorner - \circ - \lrcorner - \dots - \lrcorner - \lrcorner \\ | \quad | \quad \quad \quad | \quad | \quad | \quad \quad \quad | \quad | \end{array} . \quad (7)$$

Unitary gauge transformation:

$$\begin{array}{c} L_i \\ \text{---} \square \text{---} \end{array} \rightarrow \begin{array}{c} U_{i-1}^\dagger \quad L_i \quad U_i \\ \text{---} \bigcirc \text{---} \square \text{---} \bigcirc \text{---} \end{array}. \quad (8)$$

Expectation value:

$$\langle \Psi | O_i | \Psi \rangle = \begin{array}{c} A_{i-1} \quad A_i \quad A_{i+1} \\ \text{---} \bigcirc \text{---} \bigcirc \text{---} \bigcirc \text{---} \\ | \\ \text{---} \bigcirc \text{---} \bigcirc \text{---} \bigcirc \text{---} \\ \text{---} \square O \text{---} \end{array}. \quad (9)$$

$$\langle \Psi | O_i | \Psi \rangle = \begin{array}{c} L_{i-1} \quad C_i \quad R_{i+1} \\ \text{---} \square \text{---} \bigcirc \text{---} \square \text{---} \bigcirc \text{---} \square \text{---} \\ | \\ \text{---} \square \text{---} \bigcirc \text{---} \square \text{---} \bigcirc \text{---} \square \text{---} \\ \text{---} \square O \text{---} \end{array} = \begin{array}{c} C_i \\ \text{---} \bigcirc \text{---} \square \text{---} \bigcirc \text{---} \end{array}. \quad (10)$$

Multi-site expectation value:

$$\langle \Psi | O | \Psi \rangle = \begin{array}{c} L_{i-1} \quad C_i \quad R_{i+1} \\ \text{---} \square \text{---} \bigcirc \text{---} \square \text{---} \bigcirc \text{---} \square \text{---} \\ | \\ \text{---} \square \text{---} \bigcirc \text{---} \square \text{---} \bigcirc \text{---} \square \text{---} \\ \text{---} \square O \text{---} \end{array}. \quad (11)$$

MPO:

$$\begin{array}{c} \text{---} \square \text{---} \end{array} = \begin{array}{c} \text{---} \square \text{---} \square \text{---} \square \text{---} \end{array}. \quad (12)$$

MPO expectation value:

$$\langle \Psi | H | \Psi \rangle = \begin{array}{c} L_{i-1} \quad C_i \quad R_{i+1} \\ \text{---} \square \text{---} \square \text{---} \square \text{---} \square \text{---} \square \text{---} \\ | \\ \text{---} \square \text{---} \square \text{---} \square \text{---} \square \text{---} \square \text{---} \\ \text{---} \square \text{---} \square \text{---} \square \text{---} \square \text{---} \square \text{---} \end{array} = E_{i-1} \begin{array}{c} C_i \\ \text{---} \square \text{---} \square \text{---} \square \text{---} \end{array} F_{i+1} = E_i \begin{array}{c} D_i \\ \text{---} \square \text{---} \square \text{---} \square \text{---} \end{array} F_{i+1}. \quad (13)$$

Environment tensors:

$$E_1 \begin{array}{c} \text{---} \square \text{---} \\ | \\ \text{---} \square \text{---} \\ | \\ \text{---} \square \text{---} \end{array} \equiv \begin{array}{c} L_1 \\ \text{---} \square \text{---} \\ | \\ \text{---} \square \text{---} \\ | \\ \text{---} \square \text{---} \end{array}, \quad E_i \begin{array}{c} \text{---} \square \text{---} \\ | \\ \text{---} \square \text{---} \\ | \\ \text{---} \square \text{---} \end{array} \equiv E_{i-1} \begin{array}{c} L_i \\ \text{---} \square \text{---} \\ | \\ \text{---} \square \text{---} \\ | \\ \text{---} \square \text{---} \end{array}. \quad (14)$$

$$\begin{array}{c} \text{---} \square \text{---} \\ | \\ \text{---} \square \text{---} \\ | \\ \text{---} \square \text{---} \end{array} F_N \equiv \begin{array}{c} R_N \\ \text{---} \square \text{---} \\ | \\ \text{---} \square \text{---} \\ | \\ \text{---} \square \text{---} \end{array}, \quad \begin{array}{c} \text{---} \square \text{---} \\ | \\ \text{---} \square \text{---} \\ | \\ \text{---} \square \text{---} \end{array} F_i \equiv \begin{array}{c} R_i \\ \text{---} \square \text{---} \\ | \\ \text{---} \square \text{---} \\ | \\ \text{---} \square \text{---} \end{array} F_{i+1}. \quad (15)$$

iMPS:

$$|\Psi\rangle = \cdots \text{---} \bigcirc \text{---} \bigcirc \text{---} \bigcirc \text{---} \bigcirc \text{---} \bigcirc \text{---} \cdots. \quad (16)$$

Transfer matrix:

$$T = \begin{array}{c} \text{---} \circ \text{---} \\ | \\ \text{---} \circ \text{---} \end{array} . \quad (17)$$

MPS norm:

$$\langle \Psi | \Psi \rangle = \begin{array}{c} \cdots \text{---} \circ \text{---} \circ \text{---} \circ \text{---} \circ \text{---} \cdots \\ | \quad | \quad | \quad | \quad | \\ \cdots \text{---} \circ \text{---} \circ \text{---} \circ \text{---} \circ \text{---} \cdots \end{array} . \quad (18)$$

Left-orthogonal form:

$$\begin{array}{c} \text{---} \circ \text{---} \\ | \\ \text{---} \circ \text{---} \end{array} = \left[\text{---} \right] , \quad \begin{array}{c} \text{---} \circ \text{---} \\ | \\ \text{---} \circ \text{---} \end{array} \rho_L = \left[\text{---} \right] \rho_L . \quad (19)$$

Right-orthogonal form:

$$\begin{array}{c} \text{---} \circ \text{---} \\ | \\ \text{---} \circ \text{---} \end{array} = \left] \text{---} \right] , \quad \rho_R \begin{array}{c} \text{---} \circ \text{---} \\ | \\ \text{---} \circ \text{---} \end{array} = \rho_R \left[\text{---} \right] . \quad (20)$$

Mixed-canonical form:

$$|\Psi\rangle = \cdots \text{---} \square \text{---} \square \text{---} \circ \text{---} \square \text{---} \square \text{---} \cdots \quad (21)$$

$$= \cdots \text{---} \square \text{---} \square \text{---} \circ \text{---} \square \text{---} \square \text{---} \cdots . \quad (22)$$

iMPS expectation value:

$$\langle \Psi | O_i | \Psi \rangle = \begin{array}{c} \cdots \text{---} \square \text{---} \square \text{---} \square \text{---} \square \text{---} \square \text{---} \cdots \\ | \quad | \quad | \quad | \quad | \\ \cdots \text{---} \square \text{---} \square \text{---} \square \text{---} \square \text{---} \square \text{---} \cdots \end{array} = \left[\begin{array}{c} \square \\ | \\ \square \end{array} \right] \rho_L . \quad (23)$$

$$\langle \Psi | O_i | \Psi \rangle = \begin{array}{c} \cdots \text{---} \square \text{---} \square \text{---} \circ \text{---} \square \text{---} \square \text{---} \cdots \\ | \quad | \quad | \quad | \quad | \\ \cdots \text{---} \square \text{---} \square \text{---} \circ \text{---} \square \text{---} \square \text{---} \cdots \end{array} = \left[\begin{array}{c} \circ \\ | \\ \square \end{array} \right] . \quad (24)$$

Environment tensor recursion relation:

$$E(n+1) \left[\begin{array}{c} \text{---} \\ | \\ \text{---} \end{array} \right] \alpha = E(n) \left[\begin{array}{c} \text{---} \square \text{---} \\ | \quad | \\ \text{---} \square \text{---} \end{array} \right] \alpha + \sum_{\beta < \alpha} E(n) \left[\begin{array}{c} \text{---} \square \text{---} \\ | \quad | \\ \text{---} \square \text{---} \end{array} \right] \beta . \quad (25)$$

Big diagram:

$$|\Psi\rangle = \begin{array}{c} A_1 \quad A_2 \quad A_3 \quad \cdots \quad A_{N-1} \quad A_N \\ \circ \text{---} \circ \text{---} \circ \text{---} \cdots \text{---} \circ \text{---} \circ \\ | \quad | \quad | \quad \quad \quad | \quad | \end{array} . \quad (26)$$

Inline diagram: $|\Psi\rangle = \circ \text{---} \circ \text{---} \circ \text{---} \cdots \text{---} \circ \text{---} \circ$.
